

UK network coverage for +87810

All the major UK mobile networks, Vodafone,02,Orange,T-mobile and 3 are now routing the +87810 Country Code. This range is enabled for both voice and sms in the UK and across the globe.

Messaging is delivered over a technically capable and highly reliable SMS delivery infrastructure comprising three independent customer facing sites, and links directly into the infrastructure of multiple mobile network operators. The configuration includes geographic redundancy and redundant links via different suppliers between all sites. It is now possible to deploy global voice and sms services for mobile business and entertainment using just one +87810 number cross many markets at the same time.
