

87810 numbers for IoT deployment

Sentiro is the exclusive registrar for the 87810 Universal Personal Telecommunication (UPT) Country Code and IMSI range.

The flexibility of the DNS based ENUM architecture of +87810 ensures that as new technologies such as Blockchain are introduced, it is easy to adapt to them through the addition of appropriate NAPTR mapping. For further information concerning allocations contact Vincent Bergin

vincent.bergin@sentiro.com.
